

„Young women in geometric topology“

Organizers:

Valentina Bais (SISSA), Arunima Ray (University of Melbourne), Magdalina von Wunsch-Rolshoven (University of Bonn)

Venue: Hausdorff Research Institute for Mathematics Poppelsdorfer Allee 45, 53115 Bonn

This three-day workshop will highlight the work of women and gender-expansive people in geometric topology, especially early career researchers. There will be two mini courses of two lectures each, two special talks, several short invited talks, as well as contributed lightning talks. Also planned are talks, panels, and group discussions on academic careers and challenges faced by women and gender-expansive people in academia.

Invited speakers and panelists:

- Maria Rita Casali (University of Modena and Reggio Emilia)
- Alexandra Kjachukova (University of Notre Dame)
- Marissa Loving (University of Wisconsin-Madison)
- Laura Marino (University of Hamburg)
- Porter Morgan (University of Massachusetts Amherst)
- Sophia Piacenza (University of Bonn)
- Marithania Silvero (University of Seville)
- Susanna Terron (University of Glasgow)
- Paula Truöl (University of Glasgow)
- Monika (University of Warsaw)

Call for participation: Participation is free. If you are interested in participating, please fill out the application form: <https://math-events.uni-bonn.de/event/917/>. Successful applicants are selected based on research background. To be considered for financial support, please submit a CV and research overview in the application form. Additional participants are welcome to join at their own cost.

The deadline to apply for financial support is May 30, 2026.

The deadline to apply without financial support is June 15, 2026.
